

Personal Information

Jacqueline Penas, s3925262@student.rmit.edu.au

I am from the Philippines and migrated to Australia in 2008 to build a family. My husband is a QA/QC Civil Engineer working in a construction company. I am a full-time mother of 1 daughter who is in year 7. I also have proven time management and organizational skills developed from home, school, and employment overseas. I have a strong academic background and above-average results gained overseas in 1999 with a degree of Bachelor in Information Technology and have a Certificate III in

Information, Digital Media and Technology in 2019 from TAFE Qld. I am a highly articulate individual able to work confidently with diverse cultures and situations in which cultural awareness and appreciation are integral.

My Profile

I have taken 3 tests (Myer-Briggs, learning style & Big Five Personality) and these are the results: 1.

<https://www.16personalities.com/profiles/38e4744379abe>

TYPE: Assertive Protagonist

CODE: ENFJ-A

ROLE: Diplomat

STRATEGY: People Mastery

As a protagonist, I feel compelled to make a positive impact on others and do not back away from an opportunity to do the right thing, even if it isn't easy. Protagonists are natural leaders; they find a sense of joy, passion, and charisma by inspiring others, to help them grow into their full potential.

2. <https://www.learning-styles-online.com/>

Based on these test results, my learning style relies on my senses. I constantly use images and logic, prefer to be in groups, and use words to communicate in both speech and writing. I also use my body and sense of touch frequently.

Learning Styles Inventory - Results Page

For User: jackie pen

This page displays the results of your learning styles inventory. You can also select options below to compare your styles with anybody who has shared their results with you.

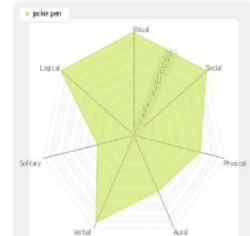

Your results

The scores are out of 20 for each style. A score of 20 indicates the style is used often.

Style Scores

Visual	15
Social	15
Physical	11
Aural	9
Verbal	14
Solitary	6
Logical	15

Learning Styles Graph

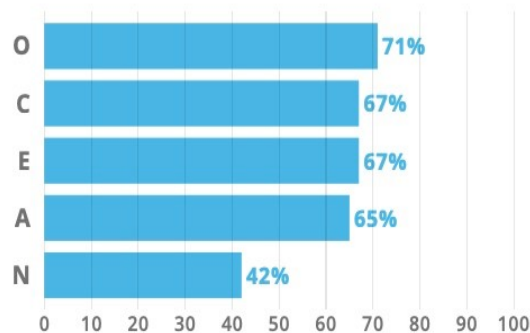

- **Visual (spatial).** You prefer using pictures, images, and spatial understanding.
- **Aural (auditory-musical).** You prefer using sound and music.
- **Verbal (linguistic).** You prefer using words, both in speech and writing.
- **Physical (kinesthetic).** You prefer using your body, hands and sense of touch.
- **Logical (mathematical).** You prefer using logic, reasoning and systems.
- **Social (interpersonal).** You prefer to learn in groups or with other people.
- **Solitary (intrapersonal).** You prefer to work alone and use self-study.

3. <https://www.truity.com>

Based on these results, I am very open-minded, accepting new opportunities and ideas easily. I complete tasks well and thoroughly, able to work in groups efficiently. I am warm, optimistic and friendly, and rarely in a negative state.

This Big Five assessment measures your scores on five major dimensions of personality: Openness, Conscientiousness, Extraversion, Agreeableness, and Neuroticism (sometimes abbreviated OCEAN). Check out your scores on each of the five dimensions in the graph below, then read on to discover what each score means.

Personally, the results of all the tests I have taken do not define me, but knowing who I really am. It denotes how I will work with other people well and efficiently. I think these tests help me identify my strengths, and weaknesses, to allow me to thrive in a variety of environments.

Ideal Job

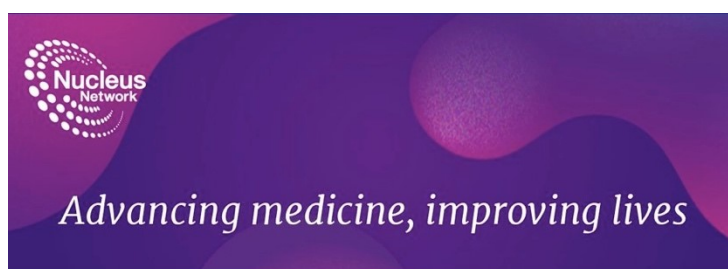

My ideal job is IT Support Specialist, also known as Technical Support Engineers. They oversee and maintain company computer systems, working within the IT Department. This job is appealing to me because I have experience and a background in software programming and hardware maintenance. I can see myself sharing my knowledge to assist others in the industry, and to do this I need certain skills and experience.

The skills, qualifications, and experience required for this position are being a graduate of any ICT (Information and Communication Technology) course or equivalent. You should be knowledgeable in different Operating Systems, familiar with business software packages (i.e. Microsoft Office), and able to adapt to innovations in technology. Being able to troubleshoot IT peripherals (input, output, and storage devices), work independently, and collaborate with others, while actively communicating ideas in a team is also required for the position. To obtain these skills, I will have to prepare by learning.

Based on the requirements from the company I am seeking employment, and the credentials I have earned at this moment, I need to complete this course first so that I can learn, more in-depth, the qualities and skills that the company is looking for. Also, I need to take some short courses, obtain certification and accreditation in line with the job I want to pursue.

Part time

Posted 28d ago

We have an exciting opportunity for a **part time IT Support Officer** to join our growing team!

Nucleus Network is the only global Phase 1 clinical trial specialist with facilities in the USA and Australia, fulfilling our purpose of “*advancing medicine and improving lives*”, by attracting the best talent.

Since our establishment in 2004, Nucleus Network has conducted well over 1000 Phase 1 clinical trials for biotechnology and pharmaceutical companies from the USA, Europe, Australia, Japan, South Korea, Taiwan and China.

We are defined by our values, great work culture, commitment to staff development and dedication to provide the best possible work environment.

Come and join us through this exciting journey of expansion and gain world-class experience servicing some of the most innovative biotechnology and pharmaceutical companies globally.

As an **IT Support Officer**, you will support our IT team with meeting our business and organizational objectives. This role is part time - 20 hours a week.

Key responsibilities:

- Review and maintain company's computer systems
- Provide day to day IT support
- Conduct IT induction for new employees
- Setup account and workstations
- Troubleshoot problems, configure hardware and software as required

Requirements:

- Educational background in Information Technology
- Familiarity with various operating systems and platforms
- An ability to use standard business software packages including Microsoft Office 365 and Microsoft Azure
- Excellent communication and interpersonal skills
- Outstanding organizational and time-management abilities
- Adaptable, shows initiative and has a strong attention to detail
- Able to work independently and effectively in a team
- Demonstrates our values of Excellence, Customer Focus, Drive and Teamwork

Benefits:

- Make a difference in “*Advancing medicine, improving lives*”
- We offer career development pathways, such as Professional Development Plans tailored to your role with LinkedIn Learning Licenses offered to further your skills and education
- Employees are recognized during our quarterly Reward and Recognition Program and have access to our rewards and benefits portal to access discounts from a range of online and in store retailers.

If you are interested in applying for this position, please include a CV and cover letter with your application.

At Nucleus Network we are committed to creating a supportive and inclusive space where every individual feels they can be their full selves. Our policy applies to all aspects of employment, including our hiring and selection process. We are an equal opportunity employer, seeking people from all life stages, backgrounds, and life perspectives. Our focus are people who embody our values of drive, teamwork, customer focus and excellence.
